

AI Investment Agent - Daily Operator Checklist (Phase 1B)

You execute in E*TRADE. The dashboard screens, scores, alerts, and records. No auto-orders. Journal is source of truth for P&L and weekly counts.

Decision stack: (1) Market Activity day gate -> (2) Stock confirmation -> (3) Trading-day GO panel (time, targets, risk, stops)

BEFORE THE OPEN

[] Setup tab: Daily ingest (or auto-refresh 6:30 AM PT)

MORNING - BEFORE 10:00 AM ET (7:00 AM PT)

[] Screen tab: Prepare today's trades (Step 2 - buy / sell / stop columns)

TRADE WINDOW - 10:00 AM to 2:30 PM ET

[] Trade tab: Refresh live before buy (updates MA, confirmation, top pick)

AFTER THE CLOSE

[] Review tab: Generate learning report

DAY GATE - MARKET ACTIVITY (new entries)

Band	New entries?
Exceptional (90+)	Yes - ranked #1-#3 if each confirms
Above average (75+)	Yes - #1 primary
Average & below (<75)	NO TRADE - ranked list visible, no new entries
Not bull (SPY 20d + weak session)	NO TRADE regardless of score

WEEKLY PRODUCTION (\$10K tier example)

Daily target \$150 | Weekly guidance 3 x \$150 = \$450 net (any day mix). One opportunity = closed win >= 67% of daily target OR stop-out. Weekly met = default stop. Exceptional override: max 1 extra/week when all signals GO.

HARD RULES

- Confirmation never overrides a NO TRADE day.

DASHBOARD TABS

Tab	Use for
Trade	Go/no-go, MA score, confirmations, top pick, proposals, alerts
Screen	Ranked screener, watchlist, Step 2 morning prep
Review	Learning report, close reports, CIO summary
Account	Journal (log trades), cash, goal %, paper/live mode
Setup	Ingest, watchlist load, auto-refresh install
